An Introduction For Potential Child Placement Care Providers Foster Care & Adoption Program

Mission Statement

Circles of Care is a private, non-profit, social service agency.
Our mission is to enhance children, youth and families ability
for effective living and growth through comprehensive
social and mental health services.

"Bringing Children and Families Together"

Circles of Care is Licensed by and receives funds from the Texas Department of Family and Protective Services

Child Placement

What is Basic Care Foster Care

Basic foster care is foster care for children in need of out of home placement, but that do not have any special medical or behavioral needs. The child functions well and similar to other children of their same age. They are in need of a caring, loving home with Care Providers who are capable of general/basic child care.

What is Therapeutic Care

Therapeutic care is specially designed to handle the demands of children/youth who have experienced various types of abuse and neglect. Their emotional or behavioral problems require special attention and interventions by Care Providers with support from Circles of Care staff, who have the ability and skills to deal with and meet those special needs to aid the children in meeting their full potential.

What is Primary Medical Care

Primary medical care is foster care provided to children with severe medical problems. These medical problems may include children who require feeding tubes to sustain life or who are not ambulatory (wheelchair bound) and require Care Providers to have specialized trainings to meet these needs.

What are Foster to Adopt Parents

Foster to adopt parents are foster parents who want to foster, but are also interested in permanent adoption for any children that may be legally available for adoption, if parental rights are terminated.

Foster Care

Potential Care Provider Qualifications & Eligibility

- 21 years old if married, 25 if single
- U.S. citizen or permanent resident
- High school diploma, GED or passing of screening test
