INTRODUCTION

Minimum Standards

These minimum standards are developed by the Texas Department of Family and Protective Services (DFPS) with the assistance of child-care operations, parents, lawyers, doctors, and other experts in a variety of fields. The child-care licensing law sets guidelines for what must be included in the standards. The licensing law requires that proposed standards be distributed to child-care operations for a 60-day review and comment period before adopting the proposed standards as rules. The Administrative Procedure and Texas Register Act requires that proposed standards be published for public comment before they are adopted as rules. The department considers recommendations from interested persons or groups in formulating the final draft, which is filed as rules with the Secretary of State. Standards are a product of contributions from many people and groups and thus reflect what the citizens of Texas consider reasonable and minimum.

The minimum standards are also weighted based on risk to children. The weights are: high, medium-high, medium, medium-low, and low. While weights reflect a common understanding of the risk to children presented if a rule is violated, the assigned weights do not change based on the scope or severity of an actual deficiency. Scope and severity are assessed by the Licensing Representative, documented, and considered in conjunction with the standard weights when making Licensing decisions. *Weights are noted in green next to each standard or subsection. Only those standards which can be violated are weighted. For example, definitions are not weighted.*

Maintaining Compliance

It is essential that operation employees and caregivers recognize four critical aspects of Licensing's efforts to protect the children in care and to help operation employees and caregivers comply with the law, rules, and standards. The four aspects are:

- Inspection
- Technical assistance
- Investigations
- Caregiver's rights and entitlements

The Inspection

Various aspects of regulated operations are evaluated for compliance with the minimum standards, rules, and law during regular inspections. The emphasis on these inspections is to prevent risk to children in care. All operations are assigned a monitoring frequency based on their compliance history.

A deficiency is any failure to comply with a standard, rule, law, specific term of the permit or condition of evaluation, probation, or suspension. During any inspection, if licensing staff find that the operation does not meet minimum standards, rule, or law, the areas of deficiency are discussed with appropriate operation employees and caregivers. Technical assistance and consultation on the problem areas are provided. Operation employees and caregivers are given the opportunity to discuss disagreements and concerns with licensing staff. If the concerns are not resolved, the operation may request an administrative review.

Technical Assistance

Licensing staff are available to offer consultation to potential applicants, applicants, and permit holders regarding how to comply with minimum standards, rules, and laws. Licensing staff often provide technical assistance during inspections and investigations. However, technical assistance can be requested at any time.

The Child Care Licensing section of the DFPS web site also has a Technical Assistance Library. The Technical Assistance Library allows you to view or download articles and information about a variety of topics related to child care. The DFPS web site is www.dfps.state.tx.us.

Also, “Helpful Information” and “Best Practice Suggestion” follow certain standards in this publication. This information is not a necessary component of meeting standards, but rather it is provided to help you meet the standards in a way best suited for your operation.

Investigations

When a report to Licensing alleges abuse or neglect, standards deficiency, or a violation of law or rule, licensing staff must investigate the report, notify the operation of the investigation, and provide a written report to the operation of the investigation results within prescribed time frames.

Your Rights and Entitlements

Waivers and Variances

If an operation is unable to comply with a standard for economic reasons, or wishes to meet the intent of a standard in a way that is different from what the standard specifies, a waiver or variance of the standard may be requested. The request is made in writing to the operation’s assigned Licensing Representative.

Administrative Review

If an operation disagrees with a Licensing decision or action, the operation may request an administrative review. The operation is given an opportunity to show compliance with applicable law, rule, minimum standards, license restrictions and/or license conditions.

Appeals

An operation may request an appeal hearing on a Licensing decision to deny an application or revoke or suspend a permit or a condition placed on the permit after initial issuance.

Appeal hearings are conducted by the State Office of Administrative Hearings (SOAH).

For Further Information

It is important that operation employees and caregivers clearly understand the purpose of minimum standards and the reasons for Licensing’s inspections. Do not hesitate to ask questions of licensing staff that will help you understand any aspect of Licensing. You may obtain information about licensing standards or procedures by calling your local Licensing office or by visiting the DFPS web site at www.dfps.state.tx.us.

Helpful Information

Regarding subsection (2), Licensing only enforces this requirement for policies required by the minimum standards. For example, Licensing does not enforce an operation's policies on purchase approvals. In addition, Licensing will not cite this standard when an operation meets a specific minimum standard but does not meet their policy which requires more than the minimum standard. For example, if an operation's policy requires caregivers to complete 12 hours of general pre-service training, and inspection results indicate that employees only completed 10 hours of training, no citation will be documented. However, if employees only completed six hours of training, a citation may be documented, since the minimum standards require eight hours of general pre-service training.

Regarding subsection (16), see Chapter 745 of the Texas Administrative Code, Subchapter G, rules §745.901 to §745.909, for more information on controlling persons.

§749.343. What policies must I develop on the discipline of children in foster care and pre-adoptive care?

Subchapter C, Organization and Administration
Division 8, Policies and Procedures
December 2014

Medium You must develop policies that guide caregivers in methods used for discipline of children in foster care or adoptive placement prior to consummation. Your discipline policies must integrate trauma informed care into the care, treatment, and management of each child, and include:

Medium (1) Measures for positive responses to appropriate behavior;

Medium (2) If you work with infants, a statement that discipline of any type is not appropriate or permitted for infants; and

Medium (3) The importance of nurturing behavior, stimulation, and promptly meeting the child's needs.

Best Practice Suggestion

While discipline is broadly defined, it is still the intent of the rule to prohibit any formal or structured discipline of infants. Infants do not have the cognitive ability to understand verbal direction and modify their behavior accordingly. Nothing can substitute for adult supervision and interaction.

For example, if a 14-month-old is wandering toward the street, a caregiver can say "Stop! I need you need to stay close to me," but this cannot substitute for physically preventing the child from entering the street. The caregiver cannot expect the child to stop and cannot expect the infant to not repeat this behavior.

This does not mean that an infant should not experience natural consequences for their behavior, but rather that the caregiver should not expect any cognitive learning or behavior modification to result. For example, if a 15-month-old bites someone, the caregiver should separate the biting infant and show empathy for the biting victim, but you cannot expect any consequences that the infant experiences to effect future biting behavior.

While an infant should experience natural, non-punitive consequences (e.g. being moved away from a hot stove), any expectation that an infant learn and modify his behavior could lead to unrealistic expectations, decreased supervision necessary to prevent dangerous situations, and frustration on the part of the caregiver.

Corporal punishment is prohibited for all children, regardless of age (see §749.1953). Per §749.1957(12), children may not be confined to furniture or equipment (such as a high chair) as discipline.

Helpful Information

Regarding subsection (a)(2), not every trip to a hospital or emergency clinic must be reported as a serious incident. Only those incidents involving a "critical injury or illness" must be reported and documented as a serious incident. The rule contains some examples of reportable serious incidents. Visits to the emergency room or emergency clinic (that did not result in hospitalization) for a common illness such as the flu, for a chronic illness such as an asthma attack, or for a routine medical exam would not warrant reporting as a serious incident.

Also, it is the nature of the injury or illness that determines whether it is reportable as a serious incident, not the venue in which it is treated. Taking a child to the emergency clinic or doctor's office for stitches is still reportable as a serious incident, even though the treatment did not occur at an emergency room or hospital.

(continued)

Helpful Information (continued)

Regarding children receiving treatment services for primary medical needs, planned admissions to the hospital are not reportable as serious incidents. If the child sustains a critical injury or contracts a critical illness, a serious incident report is required. However, ongoing treatment for the child's chronic illnesses or conditions is not reportable as a serious incident.

In addition, admission to a psychiatric hospital only warrants a serious incident report if the admission is precipitated by a reportable incident, such as a suicide attempt. The admission itself is not reportable as a serious incident.

§749.505. What constitutes a suicide attempt by a child?

*Subchapter D, Reports and Record Keeping
Division 1, Reporting Serious Incidents and Other Occurrences
September 2010*

(no weight)

A suicide attempt is a child's attempt to take his own life using means or methods for causing his death, including any act a child commits intending to cause his death, but excluding suicidal gestures where it is clear that the act was unlikely to cause death. Suicidal thoughts are not reportable as a suicide attempt.

§749.507. When must I report other occurrences?

*Subchapter D, Reports and Record Keeping
Division 1, Reporting Serious Incidents and Other Occurrences
September 2010*

You must report and document the following occurrences to the following entities within the specified time frame:

Occurrences	(i) To Licensing? (ii) If so, when?	(i) To Parents? (ii) If so, when?
(1) Medically pertinent incidents, such as seizures, that do not rise to the level of a serious incident.	(A)(i) NO (A)(ii) Not applicable; however, you must document the type of incident including the date, time, action taken, and child's name. Medium-High	B)(i) YES (B)(ii) Within seven days. Medium-High
(2) Changing your child-placing agency administrator.	(A)(i) YES, in writing. (A)(ii) Within seven days after the action is taken. Medium-High	(B)(i) NO (B)(ii) Not applicable.

January 2007*

- Medium (a) All serious incident reports must be made to the Child Abuse Hotline.

§749.511. How must I document a serious incident?

Division 1, Reporting Serious Incidents and Other Occurrences
September 2010*

- Medium A serious incident must be documented in a written report that includes the following information:
- Medium (1) The name of the foster home or adoptive home, physical address, and telephone number;
- Medium (2) The time and date of the incident;

- Medium (9) The treating licensed health-care professional's name, findings, and treatment, if any; and
- Medium (10) The resolution of the incident.

Helpful Information

Regarding subsection (3), this requirement is not intended to conflict with confidentiality laws or rights. Identifying information for one child should not be placed in the record of another child. You may choose to 1) write one incident report that is filed centrally (not in each child's record) and de-identified when released as part of a child's record, 2) write one incident report that is filed in each child's record, with each copy de-identified to not show the full name of other children involved in the incident, or 3) write a separate incident report for each child, with only the first name or initials of each other child involved.

(continued)

Helpful Information (continued)

Regarding subsection (5), witnesses to the incident are persons who were present when the incident occurred and can give a first-hand account of what they experienced during the incident. A person is not automatically a witness because he lives in the same unit or cottage as the child involved in the incident. Witnesses may also be persons unaffiliated with the operation, such as a visitor to the operation who was present at the time of the incident.

Division 2, Admission Assessment
January 2007*

- Medium (a) You must make reasonable efforts to obtain all required information.

- Medium (1) Particular piece of information is unavailable; or
- Medium (2) Delay obtaining a piece of information is necessary, including efforts made to obtain the information.

Helpful Information

Regarding subsection (a), Licensing expects documentation of at least three attempts to comply with a minimum standard requiring "reasonable effort" to obtain information. Efforts should be reasonably spaced, allowing enough time for a person to respond yet not unreasonably delaying the acquisition of the requested information.

Example: *Calling a CPS caseworker or parent three times in one day would not be considered three separate "reasonable efforts" to obtain needed information, as this does not allow the person reasonable time to respond to each of the requests.*

Example: *Calling a CPS caseworker or parent once every three months to obtain information needed for an admission assessment would not be considered reasonable effort to obtain the information, as the third attempt would be made at least six months after the child was placed.*

Example: *Calling a CPS caseworker or parent once a week for three weeks to obtain information needed for an admission assessment would be considered reasonable effort to obtain the information, as this gives ample time for the person to respond to each call, and also seeks to obtain the information within one month of admission. No further attempts would be expected if the information was not obtained after these three attempts.*

Subchapter I, Foster Care Services: Service Planning, Discharge

Helpful Information

You may combine admission and service plan documentation, as long as the documentation meets the content requirements and time frames required by the applicable minimum standards. For example, you may combine an admission assessment and initial service plan for a child admitted as an emergency admission, as long as the content of the document complies with both §749.1133 and §749.1309 and the document is complete within 40 days of admission. A preliminary service plan would still be needed within 72 hours of admission, per §749.1301.

Division 1, Service Plans

§749.1301. What are the requirements for a preliminary service plan?

*Subchapter I, Foster Care Services: Service Planning, Discharge
Division 1, Service Plans
January 2007*

- | | |
|-------------|--|
| Medium | (a) You must complete a preliminary service plan that addresses the immediate needs of the child, such as enrolling the child in school or obtaining needed medical care or clothing, within 72 hours of the child's admission. |
| Medium | (b) In addition, for a child receiving treatment services the preliminary service plan must include: |
| Medium | (1) A description of the child's immediate treatment and care needs; |
| Medium | (2) A description of the child's immediate, educational, medical, and dental needs, including possible side effects of medications or treatment prescribed to the child; |
| Medium | (3) A description of how you will meet the child's needs, including any necessary increased supervision or follow-up actions of possible side effects of medication or treatment provided to the child; |
| Medium-High | (4) The identification of any issues or concerns the child may have that could escalate a child's behavior. Identification of a child's issues or concerns must serve to avoid the use of unnecessary emergency behavior interventions with the child. Child concerns may include issues with food, eye contact, physical touch, personal property, or certain topics; and |
| Medium | (5) A designation of who will be responsible for meeting each of the child's needs. |
| Medium-Low | (c) The plan must be compatible with the information included in the child's admission assessment. |
| Medium-Low | (d) You must document the plan in the child's record. |

(continued)

- Medium (e) You must inform each professional service provider and caregiver working with a child about the child's preliminary service plan.
- Medium (f) You must implement and follow the preliminary service plan.

Best Practice Suggestion

It is a good idea to include in service plans specific information about the situations that trigger significant emotional responses for the child (e.g., enclosed spaces, darkness, bedtime), successful intervention strategies to effectively de-escalate those responses, anger and anxiety management options to assist the child in calming, techniques for self-management, and specific goals that address the targeted behaviors that most often lead to emergency behavior interventions for the child.

§749.1305. Who must be involved in developing the preliminary service plan?

*Subchapter I, Foster Care Services: Service Planning, Discharge
Division 1, Service Plans
January 2007*

- Medium-Low The child placement staff must develop, sign, and date the preliminary service plan.

§749.1307. When must I complete an initial service plan?

*Subchapter I, Foster Care Services: Service Planning, Discharge

The service planning team may prioritize the child's service planning goals and objectives based on the child's admission assessment. However, any required service plan components not initially addressed must have a justification for the delay in addressing the needs.
- Medium (b) The child's initial service plan must be documented in the child's record and include those items that a preliminary plan must include (see §749.1301 of this title (relating to What are the requirements for a preliminary service plan?)), and the items noted below for each specific type of service that you provide the child:

Division 3, Discharge and Transfer Planning

Best Practice Suggestion

If you suspect the person picking up a child is under the influence of drugs or alcohol, you have the option of contacting local law enforcement to request their assistance.

You may not legally prevent the child from being picked up by a parent or person designated by the parent; however, you have the option of addressing this issue at admission by asking parents what they would like for you to do if you do not feel comfortable releasing the child to one of the parents or their designee and signing an agreement to this effect.

Law enforcement officers and DFPS Child Protective Services staff have the authority by law to remove a child without a parent's permission.

You may want to ask to see identification of persons you do not know.

§749.1361. What does a “transfer” of a child in care mean?

*Subchapter I, Foster Care Services: Service Planning, Discharge
Division 3, Discharge and Transfer Planning
September 2010*

(no weight)

A transfer refers to a child in care who is moved from one of your programs to another one of your programs operated under the same permit or at the same location. For example, a child may transfer from one foster home in which he was receiving treatment services to another foster home that offers a transitional living program. A child may also transfer from your child-placing agency to your general residential operation, if your child-placing agency office is located on the same property as your general residential operation. This term does not apply if the child experiences a change in programs or services but remains in the same foster home. This term also does not apply if the child moves from one foster home to another for a reason other than a need for different services/programming, such as moving to be closer to siblings.

Helpful Information

A transfer must comply with §§749.1363, 749.1365, and 749.1367. A transfer does not require:

- A discharge summary*
- An admission assessment*
- A preliminary or initial service plan*

See §749.1333 regarding service plan updates related to transfers.

Movement from one foster home to another within the same child-placing agency is only considered a transfer when the primary reason for the move is to provide the child with programmatic or treatment services not offered in the child's current foster home but offered in the foster home to which the child is moving. Moves for other reasons, such as the foster parents deciding to relinquish their verification, are regulated as subsequent placements.

§749.1363. Who must plan a child's non-emergency discharge or transfer?

*Subchapter I, Foster Care Services: Service Planning, Discharge
Division 3, Discharge and Transfer Planning
January 2007*

- (a) You must involve at least the following persons in planning the child's non-emergency discharge or transfer:
- Medium-Low (1) At least one of the child's current caregivers; and
- Medium-Low (2) At least one professional service provider involved in the child's service planning.
- (b) You must invite the following persons to participate in planning the child's non-emergency discharge or transfer, if appropriate:
- Medium-Low (1) The child;
- Medium-Low (2) The child's parent(s); and
- Low (3) Any other person pertinent to the child's care.
- Low (c) If you are unable to plan the transfer or discharge with the persons required in subsections (a) and (b) of this section, you must document in the child's record the reason why.
- Medium-Low (d) If a child in your care is not receiving treatment services, you must inform him of his non-emergency discharge or transfer at least four days prior to the date of the discharge or transfer, unless your licensed child-placing agency administrator or child placement management staff has clear justification for not giving him such notice. The licensed child-placing agency administrator or child placement management staff who determines the justification for the child not having the advance notice of the discharge or transfer, must put the justification in writing and sign and date it. The justification must be in the child's record.
- Medium-Low (e) If a child in your care is receiving treatment services, you must inform him of his non-emergency discharge or transfer at least four days prior to the date of the discharge or transfer, unless your treatment director, three members of the child's service planning team, or the child's psychiatrist or psychologist has a justification for not giving him such notice. Whoever determines the justification for the child not having the advance notice of the discharge or transfer must put the justification in writing and sign and date it. The justification must be in the child's record.

§749.1365. May a foster home release a child to any person without my consent?

Best Practice Suggestion

Here are some best practices for use and storage of a child's toothbrush:

- Soft-bristle toothbrushes, provided for each child's individual use after meals and snack times, which are:
 - Age appropriate;
 - Labeled with the child's full name;
 - Stored in a manner that prevents the toothbrushes from touching each other and the bristles are not in contact with any surface during storage; and
 - Replaced immediately if the bristles become splayed.
- For children under six years old, toothbrushes stored out of children's reach when not in use.

Here are some best practices for use of toothpaste:

- Provide fluoride toothpaste for children three years old or older, or for children who have learned how to spit out toothpaste when brushing.
- Use only a pea-sized amount of toothpaste for children under six years old. Provide adult supervision in the use of toothpaste for children under six years old or children who have not learned how to spit out toothpaste when brushing. This helps to prevent swallowing the toothpaste and possible fluoride poisoning.

- (1) Has lived, worked, or volunteered at a regulated residential child-care operation within the previous 12 months. For example, an employee beginning employment in a regulated residential child-care operation for the first time would need a baseline tuberculosis screening. Employment in a different residential child-care operation would not require a new screening, as long as documentation in paragraph (2) of this subsection is also provided. If the employee left employment in regulated residential child-care for more than 12 months and then returned, a new screening would be required; and
 - (2) Provides documentation of a tuberculosis screening.

- (c) Except on the advice of a physician, no additional screening is required for a person who continues to live, work, and/or volunteer in a regulated residential child-care setting.

Helpful Information

Current CDC recommendations are as follows:

- *Conduct a baseline tuberculosis screening. This screening includes a two-step tuberculosis skin test or a single blood assay for mycobacterium tuberculosis to test for infection with mycobacterium tuberculosis.*
- *After the initial baseline screening is conducted and shows negative for tuberculosis, no other testing is required as long as the person continues to live, work, or volunteer in a regulated residential child-care operation.*
- *In any of the following circumstances, use a chest radiograph to exclude TB disease:*
 - *The person's baseline screening shows positive,*
 - *The result shows a mycobacterium tuberculosis infection, or*
 - *There is documentation of treatment for latent tuberculosis infection or tuberculosis disease.*

Obtain the chest radiograph within a six-month period from the initial baseline screening. Repeat radiographs are not needed unless symptoms or signs of TB disease develop, unless recommended by a physician, or unless the person ceases to live, work, or volunteer in a regulated residential child-care operation for more than 12 months.

Helpful Information

Documenting the time a medication is given:

For medications with regularly scheduled doses, you may use the regularly scheduled time to document giving the medication as long as it is given within thirty minutes of the scheduled time. Otherwise, you must document the actual time the medication is given.

Example: For a regularly scheduled 9:00 a.m. medication given at 9:20, you may document 9:00 a.m.; if the medication is given at 9:45, then you must document 9:45 a.m.

If you document the time by initialing the regularly scheduled time (pre-printed on the form), there must be space on the form to document the time given when it is outside the 30-minute window.

For medications that are PRN or one-time only, you must document the exact time the medication is given.

Documenting the name and signature of the person who administered a medication:

The purpose of the signature is to be able to identify the person who administered a specific medication to a child, if a concern arises later about that medication. Licensing requires one full signature for each person who administers medication, but there is no need for the person to record a full signature for each dose of medication that he/she administers. Most medication records provide space for a signature and matching initials (usually at the bottom of the page or on the back), then only require a person to use his/her initials to record each time he/she actually gives a dose of medication. Using this system, the initials can be matched to the signature as needed. This complies with minimum standards.

- *Baby bungee jumpers present a hazard due to increased risk of injury to the child as a result of spinning, swinging, or bumping into walls while placed in the jumper.*
- *Accordion gates with large V-shaped openings along the top edge and diamond shaped openings between the slats present entrapment and entanglement hazards resulting in strangulation, choking or pinching to children who try to crawl through or over the gate.*
- *Examples of items that present a choking hazard for infants and toddlers include coins, balloons, safety pins, marbles, Styrofoam[®] and similar products, and sponge, rubber or soft plastic toys.*
- *Studies on SIDS support eliminating soft bedding materials and stuffed toys used for children under six months old.*
- *Examples of items that can be used as alternatives to blankets and sheets are a one-piece footed sleeper, a body shirt or undershirt underneath a sleeper, sleep sack or wearable blanket that zips up the front and can be worn over a sleeper. Wearable blankets are sleeveless, so a baby can still move his arms around while the rest of his body stays covered.*

Helpful Information

Chapter 768 of the Texas Health and Safety Code outlines specific requirements for children who participate in rodeos, including wearing protective gear. Operations need to be aware of the requirements of this law if children in their care participate in rodeos.

§749.1923. What physical fitness activities must caregivers provide for a child receiving treatment services for primary medical needs or mental retardation?

*Subchapter K, Foster Care Services: Daily Care, Problem Management

*Subchapter K, Foster Care Services: Daily Care, Problem Management
Division 5, Recreational Services

Medium-Low A child receiving treatment services for primary medical needs or mental retardation must have a schedule that is based on the normalization principle. In order to help the child obtain an existence as normal as possible, the daily schedule must:

- Medium-Low (1) Demonstrate an understanding of normal child development; and

§749.1927. To what extent must a child receiving treatment services for primary medical needs or intellectual disabilities have normal life experiences?

*Subchapter K, Foster Care Services: Daily Care, Problem Management
Division 5, Recreational Services
December 2014*

Medium A child receiving treatment services for primary medical needs or intellectual disabilities should experience normalcy as much as possible and as appropriate for the child's special needs. This means that the child's foster parents must be routinely and personally involved with the child. This involvement must include:

- Medium (1) Daily one-on-one interaction between the child and the foster parent primarily responsible for the child's care;
- Medium (2) Participation in everyday family activities to the extent the child is able, such as having meals together, participating in family time, and participating in family outings;
- Medium (3) Sensory stimulation for the child, such as the child being held, being read to, being played with, and being talked to, and the foster family watching television and listening to music together;
- Medium (4) Actively participating in the child's medical care, including appointments and hospitalizations; and
- Medium (5) Actively participating in the child's educational needs.

Division 6, Discipline and Punishment

§749.1951. What are the requirements for disciplinary measures?

*Subchapter K, Foster Care Services: Daily Care, Problem Management
Division 6, Discipline and Punishment
January 2007*

- | | |
|-------------|---|
| Medium | (a) Only a caregiver known to and knowledgeable of a child may discipline the child. |
| Medium | (b) Each disciplinary measure must: |
| High | (1) Be consistent with your policies and procedures; |
| Medium | (2) Not be physically or emotionally damaging to the child; |
| Medium-High | (3) Be individualized to meet each child's needs; |
| Medium | (4) Be appropriate to the child's level of understanding, age, and developmental level; and |
| Medium | (5) Be appropriate to the incident and severity of the behavior demonstrated. |
| Medium | (c) The goal of each disciplinary measure must be to teach the child acceptable behavior and self-control. The caregiver must explain the reason for the disciplinary measure when the caregiver imposes the measure. |

Best Practice Suggestion

It is a good idea for disciplinary measures to be consistent among caregivers. Using positive methods of discipline and guidance encourage self-esteem, self-control, and self-direction. Positive methods of discipline include the following:

- *Using praise, positive reinforcement, and encouragement of good behavior instead of focusing only on unacceptable behavior;*
- *Reminding a child of behavior expectations daily by using clear, positive statements;*
- *Talking with the child about the situation;*
- *Focusing on the rule to learn and the reason for the rule;*
- *Focusing on solutions that are respectful, reasonable, and related to the problem behavior, rather than blaming or focusing on consequences;*
- *Redirecting the child's attention or behavior using positive statements;*
- *Providing prior notice of possible consequences for inappropriate behaviors;*
- *Giving the child acceptable choices or alternatives;*
- *Using brief supervised separation or time away from the group or situation, when appropriate for the child's understanding, age, and development. Best practice suggests that quiet time or time out from the group be limited to no more than one minute per year of the child's chronological or developmental age. However, this time frame may need to be adjusted for some children, such as a child who has attention-deficit disorder. Time out is not appropriate for infants and is not recommended for toddlers, since they are too young to understand this intervention;*

(continued)

Best Practice Suggestion (continued)

- *Arranging the environment to allow safe testing of limits;*
- *Using kind but firm action;*
- *Giving logical consequences that are appropriate to the situation and severity of the behavior; and*
- *Withholding privileges.*

§749.1953. May I use corporal punishment for children in care?

*Subchapter K, Foster Care Services: Daily Care, Problem Management
Division 6, Discipline and Punishment
January 2007*

- High
(no weight)
- (a) You may not use or threaten to use corporal punishment with any child in care.
- (b) Corporal punishment is the infliction of physical pain on any part of a child's body as means of controlling or managing the child's behavior. It includes:
- (1) Hitting or spanking a child with a hand or instrument; or
 - (2) Forcing or requiring the child to do any of the following as a method of managing or controlling behavior:
 - (A) Perform any form of physical exercise, such as running laps or doing sit ups or push ups;
 - (B) Hold a physical position, such as kneeling or squatting; or
 - (C) Do any form of "unproductive work."

§749.1955. What is "unproductive work"?

*Subchapter K, Foster Care Services: Daily Care, Problem Management
Division 6, Discipline and Punishment
January 2007*

- (no weight)
- (a) "Unproductive work" is work that serves no purpose except to demean the child. Examples include moving rocks or logs from one pile to another or digging a hole and then filling it in. Unproductive work is never an appropriate behavior management tool.
- (no weight)
- (b) "Unproductive work" does not include work that corrects damage that the child's behavior caused. For example, you may require a child who defaces a fence or wall to repaint it. This example includes a logical consequence and an acceptable behavior management tool.

§749.1957. What other methods of punishment are prohibited?

*Subchapter K, Foster Care Services: Daily Care, Problem Management
Division 6, Discipline and Punishment
January 2007*

In addition to corporal punishment, prohibited discipline techniques include, but are not limited to:

- High (1) Any harsh, cruel, unusual, unnecessary, demeaning, or humiliating discipline or punishment;
- Medium (2) Denial of mail or visits with their families as discipline or punishment;
- Medium (3) Threatening with the loss of placement as discipline or punishment;
- Medium-High (4) Using sarcastic or cruel humor and verbal abuse;
- Medium-High (5) Maintaining an uncomfortable physical position, such as kneeling, or holding his arms out;
- High (6) Pinching, pulling hair, biting, or shaking a child;
- High (7) Putting anything in or on a child's mouth, such as soap or tape;
- Medium-High (8) Humiliating, shaming, ridiculing, rejecting, or yelling at a child;
- Medium-High (9) Subjecting a child to abusive or profane language;
- High (10) Placing a child in a dark room, bathroom, or closet;
- Medium-High (11) Requiring a child to remain silent or inactive for inappropriately long periods of time for the child's age;
- Medium-High (12) Confining a child to a highchair, box, or other similar furniture or equipment as discipline or punishment;
- High (13) Denying basic child rights as a form of discipline or punishment;
- High (14) Withholding food that meets the child's nutritional requirements; and
- High (15) Using or threatening to use emergency behavior intervention as discipline or punishment.

§749.1959. To what extent may a caregiver restrict a child's activities as a behavior management tool?

*Subchapter K, Foster Care Services: Daily Care, Problem Management
Division 6, Discipline and Punishment
January 2007*

- (no weight) (a) Within limits, a foster parent may restrict a child's activities as a behavior management tool.
- Medium-Low (b) Restrictions of activities, other than school or chores, which will be imposed on a child for more than 30 days, must be reviewed with and approved by the child placement management staff or treatment director prior to or within 24 hours of imposing the restriction.
- Medium-Low (c) Restrictions to a particular room or building that will be imposed on a child for more than 24 hours must have approval from the service planning team, a professional service provider, or treatment director prior to or within 24 hours of imposing the restriction.
- Medium-Low (d) You must inform the child and parent about any such restrictions you place on the child.
- Medium-Low (e) Documentation of all approvals, justification for the restriction, and informing the child and parents must be in the child's record.

§749.1961. May a person in care discipline or punish another person in care?

*Subchapter K, Foster Care Services: Daily Care, Problem Management
Division 6, Discipline and Punishment
January 2007*

- Medium-High No. A person in care must not discipline or punish another person in care except when babysitting under §749.2599 of this title (relating to Can a child serve as a caregiver?).

Subchapter L, Foster Care Services: Emergency Behavior Intervention

Division 1, Definitions

§749.2001. What do certain words mean in this subchapter?

*Subchapter L, Foster Care Services: Emergency Behavior Intervention
Division 1, Definitions
December 2014*

(no weight)

These words have the following meaning in this subchapter:

- (1) Chemical restraint – A type of emergency behavior intervention that uses chemicals or pharmaceuticals through topical application, oral administration, injection, or other means to immobilize or sedate a child as a mechanism of control. The use of medications that have a secondary effect of immobilizing or sedating a child, but are prescribed by a treating health-care professional and administered solely for medical or dental reasons, is not chemical restraint and is not regulated as such under this chapter.
- (2) De-escalation – See §749.43(15) of this title (relating to What do certain words and terms mean in this chapter?).
- (3) Emergency behavior intervention – See §749.43(19) of this title.
- (4) Emergency medication – A type of emergency behavior intervention that uses chemicals or pharmaceuticals through topical application, oral administration, injection, or other means to modify a child's behavior. The use of medications that have a secondary effect of modifying a child's behavior, but are prescribed by a treating health-care professional and administered solely for medical or dental reasons (e.g. benadryl for an allergic reaction or medication to control seizures), is not emergency medication and is not regulated as such under this chapter.
- (5) Emergency situation – A situation in which attempted preventative de-escalatory or redirection techniques have not effectively reduced the potential for injury and it is immediately necessary to intervene to prevent:
 - (A) Imminent probable death or substantial bodily harm to the child because the child attempts or continually threatens to commit suicide or substantial bodily harm; or
 - (B) Imminent physical harm to another because of the child's overt acts, including attempting to harm others. These situations may include aggressive acts by the child, including serious incidents of shoving or grabbing others over their objections. These situations do not include verbal threats or verbal attacks.

(continued)

- (6) Mechanical restraint – A type of emergency behavior intervention that uses the application of a device to restrict the free movement of all or part of a child's body in order to control physical activity.
- (7) Personal restraint – A type of emergency behavior intervention that uses the application of physical force without the use of any device to restrict the free movement of all or part of a child's body in order to control physical activity. Personal restraint includes escorting, which is when a caregiver uses physical force to move or direct a child who physically resists moving with the caregiver to another location.
- (8) PRN – See §749.43(49) of this title (relating to What do certain words and terms mean in this chapter?).
- (9) Prone restraint – Placing a child in a chest down restraint hold.
- (10) Seclusion – A type of emergency behavior intervention that involves the involuntary separation of a child from other residents and the placement of the child alone in an area from which the resident is prevented from leaving by a physical barrier, force, or threat of force.
- (11) Short personal restraint – A personal restraint that does not last longer than one minute before the child is released.
- (12) Supine restraint – Placing a child in a chest up restraint hold.
- (13) Transitional hold – The use of a temporary restraint technique that lasts no longer than one minute as part of the continuation of a longer personal or mechanical restraint.
- (14) Triggered review – A review of a specific child's placement, treatment plan, and orders or recommendations for intervention, because a certain number of interventions have been made within a specified period of time.

Helpful Information

The distinguishing variable between a PRN (as needed) psychotropic medication and an emergency medication is the circumstances under which the medication is given. A medication given to help a child manage his/her behavior or to de-escalate a child who is having trouble managing his/her behavior is regulated only as a PRN psychotropic medication. However, if the medication is given in response to an emergency situation, it is an emergency medication.

For example, a child becomes increasingly agitated after a family visit, to the point of screaming and becoming verbally abusive to caregivers and other children. The child is not able to use self-calming techniques. If the child is offered a PRN psychotropic medication under these circumstances, it is not regulated as emergency medication, because there is no emergency situation. The medication serves to help the child manage the behavior before it escalates into an emergency.

However, if the child had escalated to the point of physically assaulting someone and requiring physical restraint, then a medication offered during the restraint to help the child calm would be regulated as an emergency medication.

Division 2, Types of Emergency Behavior Intervention That May Be Administered

§749.2051. What types of emergency behavior intervention may I administer?

*Subchapter L, Foster Care Services: Emergency Behavior Intervention
Division 2, Types of Emergency Behavior Intervention That May Be Administered

 - Medium-High (1) Short personal restraint;
 - Medium-High (2) Personal restraint; and
 - Medium-High (3) Emergency medication.
- High (b) You may never administer chemical restraints, mechanical restraints, or seclusion.
- (no weight) (c) Protective and supportive devices, used appropriately, are not considered emergency behavior interventions. For information on protective and supportive devices, see Divisions 9 and 10 of Subchapter J of this chapter (relating to Foster Care Services: Medical and Dental).

§749.2053. Who may administer emergency behavior intervention?

*Subchapter L, Foster Care Services: Emergency Behavior Intervention
Division 2, Types of Emergency Behavior Intervention That May Be Administered
January 2007*

*Subchapter L, Foster Care Services: Emergency Behavior Intervention
Division 2, Types of Emergency Behavior Intervention That May Be Administered
September 2010*

- (a) Before using a permitted type of emergency behavior intervention, the caregiver must:
 - Medium-High (1) Attempt less restrictive behavior interventions that prove to be ineffective at defusing the situation; and
 - Medium-High (2) Determine that the basis for the emergency behavior intervention is:
 - (A) An emergency situation; or
 - (B) A need for a personal restraint to administer intra-muscular medication or other medical treatments prescribed by a licensed physician, such as administering insulin to a child with diabetes.
- (no weight) (b) A child's active attempt to run away may be considered an emergency situation when the following is a factor:
 - (1) The child is developmentally or chronologically under six years old;
 - (2) The child is suicidal;
 - (3) The operation is located near a high traffic area;
 - (4) Adverse weather conditions pose a clear safety risk to the child; or
 - (5) Other clear safety risks are present.

§749.2059. What is the appropriate use for a short personal restraint?

*Subchapter L, Foster Care Services: Emergency Behavior Intervention
Division 2, Types of Emergency Behavior Intervention That May Be Administered
September 2010*

- (no weight) Generally, a short personal restraint is used in urgent situations, such as:
 - (1) To protect the child from external danger that causes imminent significant risk to the child, such as preventing the child from running into the street or coming into contact with a hot stove. The restraint must end immediately after the danger is averted.
 - (2) To intervene when a child under the age of five (chronological or developmental age) demonstrates disruptive behavior, if other efforts to de-escalate the child's behavior have failed;
 - (3) When a child over five years old demonstrates behavior disruptive to the environment or milieu, such as disrobing in public, provoking others that creates a safety risk, or to intervene to prevent a child from physically fighting; or
 - (4) When a child is significantly damaging property, such as breaking car windows or putting holes into walls.

§749.2061. What precautions must a caregiver take when implementing a short personal restraint?

*Subchapter L, Foster Care Services: Emergency Behavior Intervention
Division 2, Types of Emergency Behavior Intervention That May Be Administered
January 2007*

- (a) When a caregiver implements a short personal restraint, the caregiver must:
 - Medium-High (1) Minimize the risk of physical discomfort, harm, or pain to the child; and
 - Medium-High (2) Use the minimal amount of reasonable and necessary physical force.
- (b) A caregiver may not use any of the following techniques as a short personal restraint:
 - High (1) A prone or supine restraint;
 - High (2) Restraints that impair the child's breathing by putting pressure on the child's torso, including leaning a child forward during a seated restraint;
 - High (3) Restraints that obstruct the airways of the child or impair the breathing of the child, including procedures that place anything in, on, or over the child's mouth, nose, or neck, or impede the child's lungs from expanding;
 - High (4) Restraints that obstruct the caregiver's view of the child's face;
 - High (5) Restraints that interfere with the child's ability to communicate or vocalize distress; or
 - High (6) Restraints that twist or place the child's limb(s) behind the child's back.

§749.2063. Are there any purposes for which emergency behavior intervention cannot be used?

*Subchapter L, Foster Care Services: Emergency Behavior Intervention
Division 2, Types of Emergency Behavior Intervention That May Be Administered
January 2007*

- Emergency behavior intervention may never be used as:
- Medium-High (1) Punishment;
 - Medium-High (2) Retribution or retaliation;
 - Medium-High (3) A means to get a child to comply;
 - Medium-High (4) A convenience for caregivers or other persons; or
 - Medium-High (5) A substitute for effective treatment or habilitation.

In addition, in an effort to comply with §749.2633, a child-placing agency which verifies a foster home previously verified by another agency is expected to obtain information about how much respite child-care the foster home has already provided that year and limit respite child-care in that home accordingly for the remainder of the year.

Regular washing of mattress covers may also be helpful to children who are allergic to dust mites.

Division 5, Nutrition and Food Preparation

§749.3061. What are the requirements for feeding children in care?

*Subchapter O, Foster Homes: Health and Safety Requirements, Environment, Space and Equipment
Division 5, Nutrition and Food Preparation
January 2007*

- Medium-High (a) Caregivers must give children food of adequate quality and in sufficient quantity to supply the nutrients necessary for proper growth and development.

- Medium-High (d) No more than 14 hours may pass between the last meal or snack of the day and the availability of the first meal the following day.

Best Practice Suggestion

Best practice suggests that toddlers and pre-school children should not go more than three hours without a meal or snack being offered, unless the child is sleeping or unless otherwise justified in writing by the child's health-care professional. Likewise, school-age children should not go more than six hours without a meal or snack being offered, unless the child is sleeping or unless otherwise justified in writing by the child's health-care professional.

(continued)

Best Practice Suggestion

Children's Nutrition

Research suggests the following:

- Milk and milk products served to children 12 months old or older should be Grade A pasteurized or from sources approved by the Department of State Health Services.

The following milks do not contain the right amounts of all the nutrients infants need and can harm an infant's health. Iron-fortified infant formula is the best substitute for breast milk. Infants should not be given the following unless recommended by the infant's health-care professional:

- Cow's milk;
- Evaporated cow's milk or home-prepared evaporated cow's milk formula;
- Sweetened condensed milk;
- Goat's milk;
- Soy milk; or
- Imitation milks, including those made from rice or nuts (such as almonds) or nondairy creamer.

http://www.fns.usda.gov/tn/Resources/feeding_infants.html

Feeding Infants: A Guide for Use in the Child Nutrition Programs p.24)

- Milk should be fluid milk.
- Breads and grains should be made from whole-grain or enriched meal or flour.
- Cereal should be whole grain or enriched or fortified.
- Vegetable or fruit juices should be 100% vegetable or fruit juice when used to meet a serving from the vegetable or fruit group.
- Children under one year old should not be offered unpasteurized or raw honey because it may contain spores that pose a health risk.

Food Allergies

A food allergy is caused by the body's immune system reacting inappropriately to a food or food additive. Symptoms may include wheezing, difficulty breathing, diarrhea, rashes, itching, hives, and headaches. Food allergies are most common in infants, due to their immature digestive systems. Food allergies are usually outgrown during the preschool years. Although any food may cause an allergic reaction, six foods are responsible for most of these reactions in children. These foods are:

- Peanuts;
- Eggs;
- Milk;
- Tree nuts;
- Soy; and
- Wheat.

(continued)

Best Practice Suggestion (continued)

A child who is pregnant or breastfeeding should avoid consuming peanuts and peanut products due to its association with the development of peanut allergies in infants. It is best not to offer children under two to three years old peanuts or peanut products, such as peanut butter and foods containing or cooked in peanut oil, because of the potential of developing this life-threatening and often life-long allergy. Foods that cause allergic reactions should be eliminated from the diet. However, it is important that the diet still contain a variety of foods for healthy growth and development. A child should receive a medical evaluation if food allergies are suspected. If the child's licensed physician determines that the child has a food allergy, a determination should be made of whether the child's allergic condition meets USDA's definition of disability.

Food Intolerance

A food intolerance is an adverse food-induced reaction that does not involve the body's immune system. Lactose intolerance is one example of food intolerance. A person with lactose intolerance lacks an enzyme needed to digest milk sugar. When that person eats milk products, gas, bloating, and abdominal pain may occur. It is best to provide food substitutions for children with food intolerances who cannot consume the regular meal.

(<http://www.fns.usda.gov/tn/Resources/blocks1.pdf> - pg. 18)

Choking

Research has shown that 90% of fatal choking occurs in children younger than four years old. Examples of foods that present a risk of choking include hot dogs sliced into rounds, whole grapes, hard candy, nuts, seeds, raw peas, dried fruit, pretzels, chips, peanuts, popcorn, marshmallows, spoonfuls of peanut butter, and chunks of meat larger than can be swallowed whole.

§749.3065. What must the caregiver do if a child refuses to or cannot eat a meal or snack that is offered?

- (no weight) (p) A pool cover does not substitute for any of the requirements in this rule.

Helpful Information

A backyard fence may serve as the pool fence/wall if it meets all fence/wall and gate criteria in 749.3133. Subsection (a) requires that children may not have unsupervised access to the pool area. Therefore, if the backyard fence serves as the pool fence/wall, then children may not have unsupervised access to the back yard and doors leading to the back yard must comply with 749.3133(e). If the entire backyard is serving as the pool area, children may not be in the backyard without direct caregiver supervision.

- (a) Except for a person described in subsection (b) of this section, the following chart lists the types of Central Registry findings that may affect a person's ability to be present at an operation. The chart specifies whether a person with a finding is barred from being present at an operation or is eligible for a risk evaluation, and whether a person eligible for a risk evaluation may be present at an operation pending the outcome of the risk evaluation:

Types of Central Registry Findings for Child Abuse or Neglect	Is This Person Eligible for a Risk Evaluation?	If This Person Is Eligible for a Risk Evaluation, May the Person be Present at an Operation While Children are in Care Pending the Outcome of the Risk Evaluation?
(1) A Sustained DFPS Finding of Physical Abuse.	Except for a person described in subsection (b) of this section, this person is permanently barred from being present at an operation while children are in care. Persons described in subsection (b) of this section are eligible for a risk evaluation.	Except for a person described in subsection (b) of this section, this is not applicable, because this person is not eligible for a risk evaluation. This person must not be present at an operation while children are in care. Persons described in subsection (b) of this section cannot be present at an operation while children are in care pending a risk evaluation. However, if the risk evaluation is approved, then they may be present at the operation.
(2) A Sustained DFPS Finding of Sexual Abuse.	No, this person is permanently barred from being present at an operation while children are in care.	Not applicable, because this person is not eligible for a risk evaluation. This person must not be present at an operation while children are in care.
(3) A Sustained DFPS Finding of Emotional Abuse.	Yes	Yes, (i) if the person continued to work at the operation pending the outcome of due process for the designated finding because we had not determined the person's presence at the same operation was an immediate threat or danger to the health or safety of children; or (ii) if we previously approved a risk evaluation without conditions for the same finding, the more recent check does not reveal new information about the finding, and the circumstances of the person's contact with children at the operation are the same as when we approved the risk evaluation.

(continued)

Types of Central Registry Findings for Child Abuse or Neglect	Is This Person Eligible for a Risk Evaluation?	If This Person Is Eligible for a Risk Evaluation, May the Person be Present at an Operation While Children are in Care Pending the Outcome of the Risk Evaluation?
(4) A Sustained DFPS Finding of Neglect (including neglectful supervision, physical neglect, medical neglect, and refusal to accept parental responsibility).	Yes	Yes, (i) if the person continued to work at the operation pending the outcome of due process for the designated finding because we had not determined the person's presence at the same operation was an immediate threat or danger to the health or safety of children; or (ii) if we previously approved a risk evaluation without conditions for the same finding, the more recent check does not reveal new information about the finding, and the circumstances of the person's contact with children at the operation are the same as when we approved the risk evaluation.
(5) A DFPS Finding, Not Already Sustained, of Any Types of Child Abuse or Neglect Previously Mentioned In This Chart, Where We Have Determined the Presence of the Person at an Operation Is an Immediate Threat or Danger to the Health or Safety of Children.	No, this person is temporarily barred from being present at an operation while children are in care.	Not applicable, because this person is not eligible for a risk evaluation. This person must not be present at an operation while children are in care. Note: The removal from contact with children is not permanent until the finding is sustained.
(6) A Finding of Abuse or Neglect from another state or jurisdiction, regardless of whether the finding is sustained.	The person's eligibility for a risk evaluation is the same as the relevant sustained DFPS finding noted in sections (1) – (4) of this chart.	The person's ability to be present at an operation while children are in care pending the outcome of a risk evaluation is the same as the relevant sustained DFPS finding noted in sections (1) – (4) of this chart.

(b) A prospective foster or adoptive parent, or any person that is required to undergo a background check because of the foster or adoptive parent application, is eligible for a risk evaluation for a sustained finding of physical abuse if:

- (1) It has been more than five years since the date of the physical abuse finding; and
- (2) The prospective foster or adoptive parent is related to or has a significant longstanding relationship with the foster or adoptive child.

We will notify the child-care operation in writing:

- (1) Of any criminal conviction enumerated in the relevant chart listed under §745.651 of this title (relating to What types of criminal convictions may affect a person's ability to be present at an operation?), and any sustained Central Registry finding listed in §745.657 of this title relating to (What types of Central Registry findings may affect a person's ability to be present at an operation?), including:

The notification letter will inform you that this person has not at this time had any due process regarding this matter. However, if we determine that the person is an immediate threat or danger to the health or safety of children, you must immediately remove the person from contact with children. We will subsequently notify your operation of any future decisions regarding this matter including whether the person may have contact with children.

Subchapter F, Background Checks
Division 4, Evaluation of Risk Because of a Criminal Conviction or a
Central Registry Finding of Child Abuse or Neglect
December 2012*

- (a) Criminal history and Central Registry findings may affect your ability to have an administrator's license or a licensed administrator's ability to be present at a particular operation.
- (b) You are prohibited from being a licensed administrator if you have:
 - (1) A criminal conviction or Central Registry finding that would bar you from being present at an operation while children are in care; or
 - (2) A felony conviction of a financial crime within the past 10 years.
- (c) You are not prohibited from being a licensed administrator if you have a felony conviction of a financial crime older than 10 years or a misdemeanor conviction of a financial crime. However, these crimes do require a risk evaluation and Licensing may place restrictions on your license. In addition, you may not be present at the operation while children are in care until the operation requests a risk evaluation for you, and the risk evaluation is approved.
- (d) You are not prohibited from being a licensed administrator if you have a criminal conviction or Central Registry finding that only requires a risk evaluation. However, Licensing may place restrictions on your license. In addition, you may not be present at the operation while children are in care until the operation requests a risk evaluation for you, and the risk evaluation is approved.

 - (2) The more recent check does not reveal a new finding or criminal conviction; and
 - (3) The person's role as identified in the risk evaluation decision letter and the circumstances of the person's contact with children at the operation are the same as when we approved the risk evaluation.
- (b) You must submit a new request for a risk evaluation by notifying the Centralized Background Check Unit (CBCU) at the time any of the conditions under subsection (a) of this section can no longer be met. The CBCU will then determine whether the person can continue to work or be present at your operation pending the new risk evaluation. After you notify the CBCU that you intend to request a new risk evaluation, the time frames and other processes for completing a risk evaluation that are described in this subchapter apply. Any conditions or restrictions that the CBCU put on the person's presence at the operation as a result of the previously approved risk evaluation will remain in effect unless and until they are explicitly amended by the CBCU.

 - (2) We determine that the person poses an immediate threat to the health or safety of children.
- (b) If the person is arrested or charged with a crime for which the person would be eligible to be present at the operation pending a risk evaluation if convicted, we may place conditions or restrictions on the person's presence at the operation while children are in care pending the resolution of the criminal matter as we find necessary to protect the health or safety of children.

(a) Notwithstanding Section 261.001, in this section:

- (1) "Abuse" means an intentional, knowing, or reckless act or omission by an employee, volunteer, or other individual working under the auspices of a facility or program that causes or may cause emotional harm or physical injury to, or the death of, a child served by the facility or program as further described by rule or policy.
 - (2) "Exploitation" means the illegal or improper use of a child or of the resources of a child for monetary or personal benefit, profit, or gain by an employee, volunteer, or other individual working under the auspices of a facility or program as further described by rule or policy.
 - (3) "Neglect" means a negligent act or omission by an employee, volunteer, or other individual working under the auspices of a facility or program, including failure to comply with an individual treatment plan, plan of care, or individualized service plan, that causes or may cause substantial emotional harm or physical injury to, or the death of, a child served by the facility or program as further described by rule or policy.
- (b) Except as provided by Section 261.404, a state agency that operates, licenses, certifies, registers, or lists a facility in which children are located or provides oversight of a program that serves children shall make a prompt, thorough investigation of a report that a child has been or may be abused, neglected, or exploited in the facility or program. The primary purpose of the investigation shall be the protection of the child.
